## Comments

Trying to make connections

Ending up going back to find datasets after finding ones that weren't the best to work with

Going back to edit stuff I missed, adding stuff back, new dataset

Editing and finalizing after input

Had some mishaps but ending up working through them + making dml

Had to go back and add more details and new dataset

after looking at data wasn't too bad to draw

feedback was helpful

A lot of playing around to see what made sense

A lot of trying to figure out what made sense and how to work with all of the datasets

Finally putting everything together
